

Tired of swallowing handfuls of horsepills containing citrulline and arginine-based "NO₂" products? Tired of paying inflated prices for a product that is not the best on the market? Introducing Nitrous™, a custom-engineered product that overcomes the downfalls of every other "NO₂" product on the market.

Because of its neutral taste, Nitrous™ is sold as a powder and can be mixed easily and unnoticeably with water, juice or other favorite beverage. Because it contains Di-L-Arginine-L-Malate, Nitrous™ is by far the most effective supplement of its kind. Not only is Nitrous™ perfectly bioavailable with its Ionis™ delivery system, but the combination of arginine and malic acid (malate) creates a one-two punch that gives its users unbeatable insulin secretion, muscle pumps, vascularity, energy production and exercise recovery.
