

## Progress You Can Measure

- » HIGHEST AMOUNT OF GUGGULSTEROIDS
- » IMPROVE LOOK AND CONDITION OF SKIN
- » OPTIMIZE BLOOD LIPIDS
- » HEALTHILY INCREASE METABOLISM AND LOSE WEIGHT
- » NATURAL BROWN EXTRACT AND E & Z GUGGULSTERONES

# Guggulbolic®

## The Hype

Guggulsteroids have been shown in studies to maintain normal blood lipid levels, support a fine skin texture by decreasing the appearance of blemishes and optimize thyroid gland function (thus supporting ideal fat loss and body weight).

Guggulbolic® combines 30 mg of pure E & Z guggulsterones along with a special, dark brown guggul extract which is standardized for an ultra-potent 6% TOTAL guggulsteroids and which conforms to all Ayurvedic standards.

## The Facts

### 1. What is Guggulbolic®?

Guggulbolic® is a dietary supplement containing a full spectrum of naturally-occurring, metabolic-regulating guggulsteroids.

### 2. Does Guggulbolic® contain the yellow or dark brown extract?

Guggulbolic® contains the dark brown guggul extract, which conforms to all Ayurvedic methods of extraction. It is vastly superior to the solvent-extracted yellow guggul extract. The dark brown guggul extract contained in Guggulbolic® is standardized for a potent 6% total, full-spectrum guggulsteroids. If you are looking to reap the many benefits from guggul, then it is imperative to always make sure you consume only the dark brown extract (which, by the way, smells like a cross between coffee and raisins).

### 3. Why does Guggulbolic® contain pure E & Z guggulsterones?

There is much research specifically on these guggulsterones from guggul for the purpose of promoting optimal cholesterol and triglyceride levels. Although the dark brown extract contains these guggulsterones, our research shows that Guggulbolic® works significantly better for these specific purposes with the addition of greater quantities of these compounds.

### 4. What can be expected from using Guggulbolic®?

Guggulbolic® has been time-tested over many years of use. Its results are consistent and predictable. Users notice improved skin appearance, increased metabolic rate (due to optimization of thyroid gland function) and optimized blood lipid profiles. Most users experience a noticeable feeling of warmth or heat from using Guggulbolic®, which is most likely a result of the increased metabolic rate.

## 5. Is Guggulbolic® safe?

Yes! Guggulbolic® is extremely safe for men and women. Occasionally, someone will have a slight dermal reaction to one of the components in the dark brown extract. Although harmless, if this occurs, you may return the product for a full refund or credit.

## 6. What about the value?

We urge you to compare the price and overall value of Guggulbolic® to any other guggul product on the market. It will quickly become obvious that there is no comparison. We don't say this lightly!
